RE: Capstone Application Proposal for the Columbian Square Business Association

Dear Ms. Dibona,

I would like to follow up on the proposal that Rohith Parvathaneni and I submitted to you on Monday, June 22nd regarding our application for a capstone at Weymouth High School. As previously mentioned, this mobile application would allow for the immediate distribution of information, opportunities and announcements to the Weymouth school community. This new system would supplement existing communication systems, including but not limited to e-mails, phone calls and TV alerts, in an attempt to create a more informed and active school population.

With any mobile application of this degree, there are several costs pertaining to development and sustainability. As the Weymouth High School Capstone Project does not specify the need for students to raise funds on their own for such work, Rohith and I are very grateful for any external support we can receive. The necessary costs for deploying and maintaining the application for SY 15-16 and SY 16-17 are as follows:

| | |
|---|-------|
| Apple Developer License (2 year subscription) | \$150 |
| Google Play Store Application | \$25 |
| Website Domain and Management Services | \$350 |

Financial support from the Columbian Square Business Association will be graciously acknowledged with multiple areas for sponsor logos and messages to appear within the application. Rohith and I plan to implement a "Sponsor of the Day" to be chosen at random, as well as a separate page that lists all the sponsors contributing to said costs. Please inform either Rohith or myself what further steps we can take to assist the Columbian Square Business Association with this proposal. We are available to present our work, including statistical data as of June 2015 showing the need for such an application in the school community, per your request.

Please do not hesitate to contact me with any questions.

Sincerely,

Kevin Lyons
